Case Studies and Alternative Experiences in Dealing with the Real World of Loans and Travelling Exhibitions

Dr. Luiz Souza, Federal University of Minas Gerais, Belo Horizonte, Brazil

The presentation will focus on the experience accumulated by LACICOR - Conservation Science Laboratory (Federal University of Minas Gerais, Brazil) in dealing with diverse situations related to climate control and management as part of the complex interdisciplinary realm of exhibition organisation and execution. Case studies will be presented together with a critical evaluation of the effectiveness of strict and more open approaches and solutions to the particular problems related to preventive conservation, risk management, and climate requirements for loans and exhibitions.
